

## Sharing a Video from eStream

There are a number of options for sharing a video directly from eStream which will be covered in this help sheet.

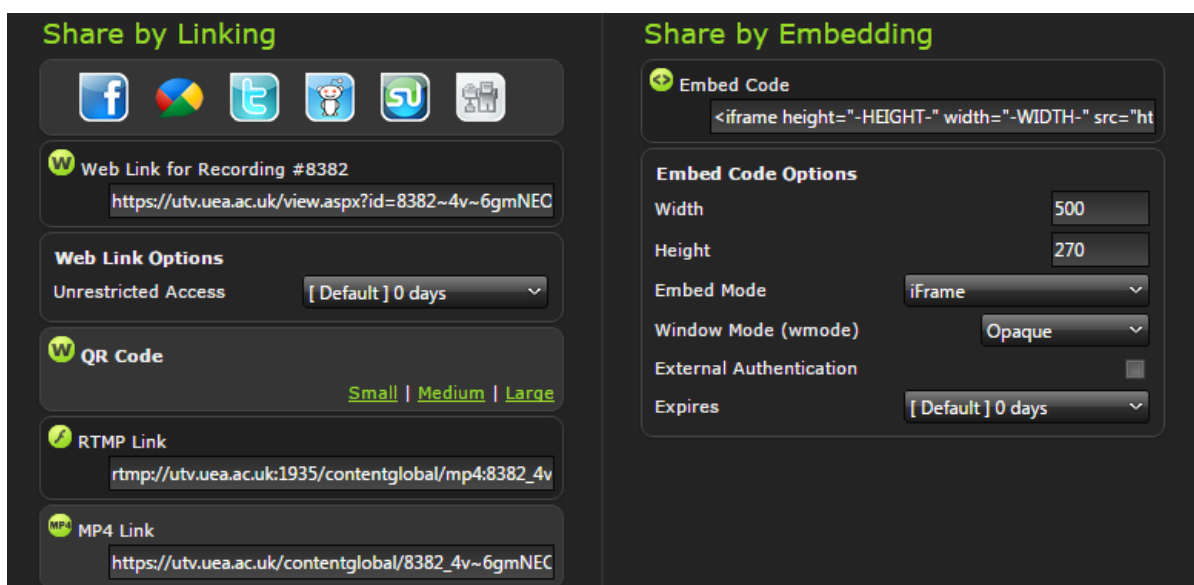

First of all navigate to eStream using this address <https://utv.uea.ac.uk/>

From here you can search or browse for the video that you would like to share.

To access the sharing options click on the **Options** button and from the menu select **Share**.

This will open the sharing options.

Here you will see a number of options.

## **Social Media**

If you would like to share the video to social media such as Facebook or Twitter click on the relevant link which will take you through the process of adding the video to that service.

## **Link**

You can also link directly to the video using the provided web link which can be pasted into documents, emails and other web pages.

## **Embed Video**

You can also share the video by embedding it directly into a web page.

Here you can choose a number of options such as the size of the embedded video and the embed type.

Changes to these options will be reflected in the embed code at the top of the options page. Once you are happy with the options that you have chosen you can copy the embed code and paste it into your web page.

## **QR Code**

You can also share your video using a QR code which is automatically generated by eStream. Simply click on the size of the QR code that you would like to use and it will open the file in a new tab. To save to file simply right click on it and from the menu select **Save Image As**.
