

Add eStream Video to Blackboard

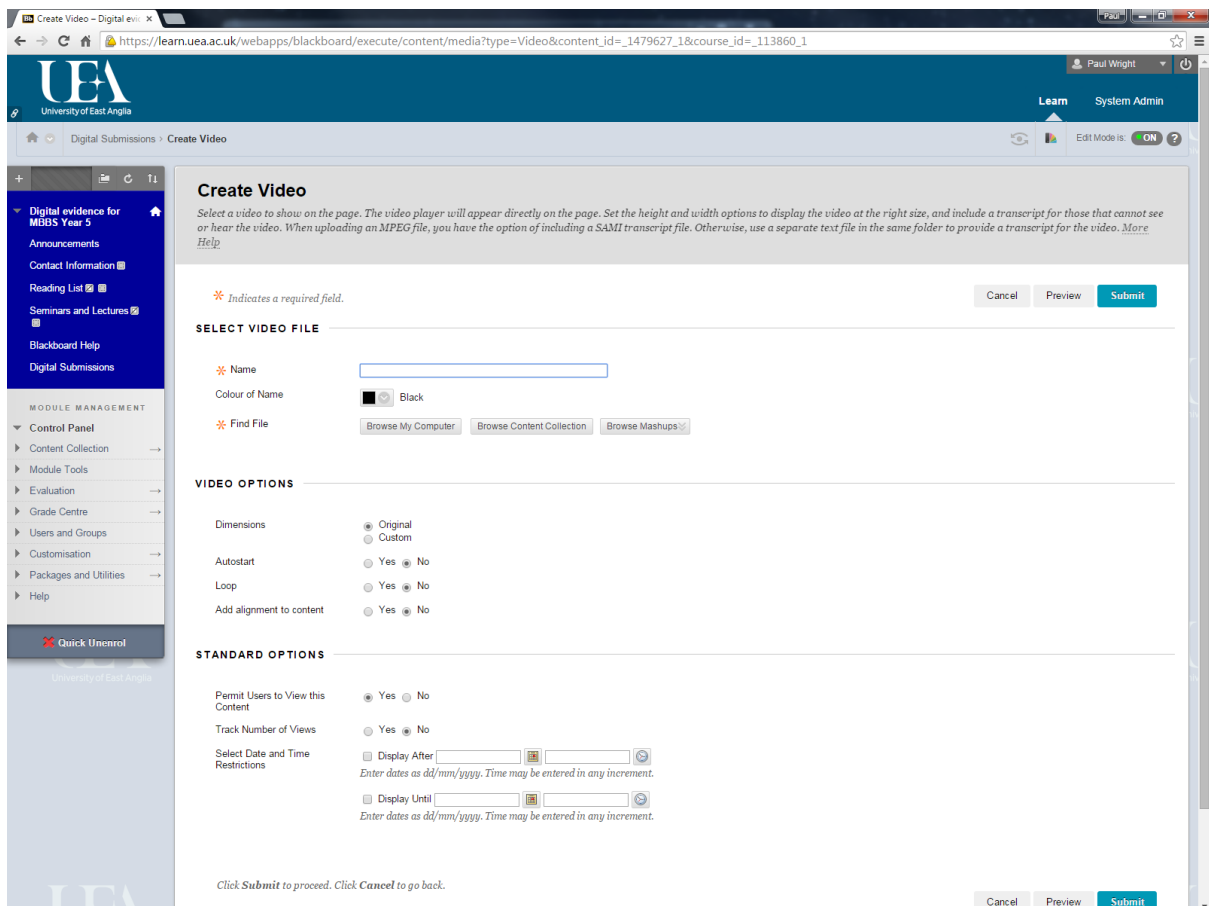

First of all navigate to Blackboard using this address <https://learn.uea.ac.uk>

You can then navigate to the module that you would like to add an eStream video to using the **My Modules** section in the centre of the page.

Once you are inside your module there are two ways that you can add a video.

Add Video as Content Item

To do this click on the **Build Content** button at the top of the page and from the dropdown list select **Video**.

The screenshot shows the 'Create Video' form in Blackboard. The form is titled 'Create Video' and includes a description: 'Select a video to show on the page. The video player will appear directly on the page. Set the height and width options to display the video at the right size, and include a transcript for those that cannot see or hear the video. When uploading an MPEG file, you have the option of including a SAMI transcript file. Otherwise, use a separate text file in the same folder to provide a transcript for the video. More Help'. The form is divided into several sections: 'SELECT VIDEO FILE', 'VIDEO OPTIONS', and 'STANDARD OPTIONS'. The 'SELECT VIDEO FILE' section has a 'Name' field, a 'Colour of Name' dropdown (set to 'Black'), and a 'Find File' section with buttons for 'Browse My Computer', 'Browse Content Collection', and 'Browse Mashups'. The 'VIDEO OPTIONS' section has radio buttons for 'Dimensions' (Original/Custom), 'Autostart' (Yes/No), 'Loop' (Yes/No), and 'Add alignment to content' (Yes/No). The 'STANDARD OPTIONS' section has radio buttons for 'Permit Users to View this Content' (Yes/No), 'Track Number of Views' (Yes/No), and 'Select Date and Time Restrictions' with 'Display After' and 'Display Until' date pickers. The form also includes 'Cancel', 'Preview', and 'Submit' buttons.

You will need to provide a name for the item.

Next click on the button labelled **Browse Mashups** and select **Planet eStream v5**.

This will take to the eStream search page where you can enter the name of the video you would like to add in the search box. Clicking on the **Search** button will retrieve a list of relevant videos.

Once you have found the video you would like to add click on the **Select** button and it will be added as an item within your module.

Embed Video into an Item

If you would like to embed a video into a content item that you have already created as before locate the item within your modules and next to the name click on the **arrow icon** and from the dropdown list click on **Edit**.

Once you are in edit mode place the cursor in the location where you would like to video to appear and then click on the **Mashups** button in the toolbar and select **Planet eStream Item**.

As with the previous method this will take you to the eStream search page where you can locate the video and select it.

This will then embed the video into your item.
