

Adding a video via Youtube and eStream

First you will need to obtain the 'embed code' for your video:

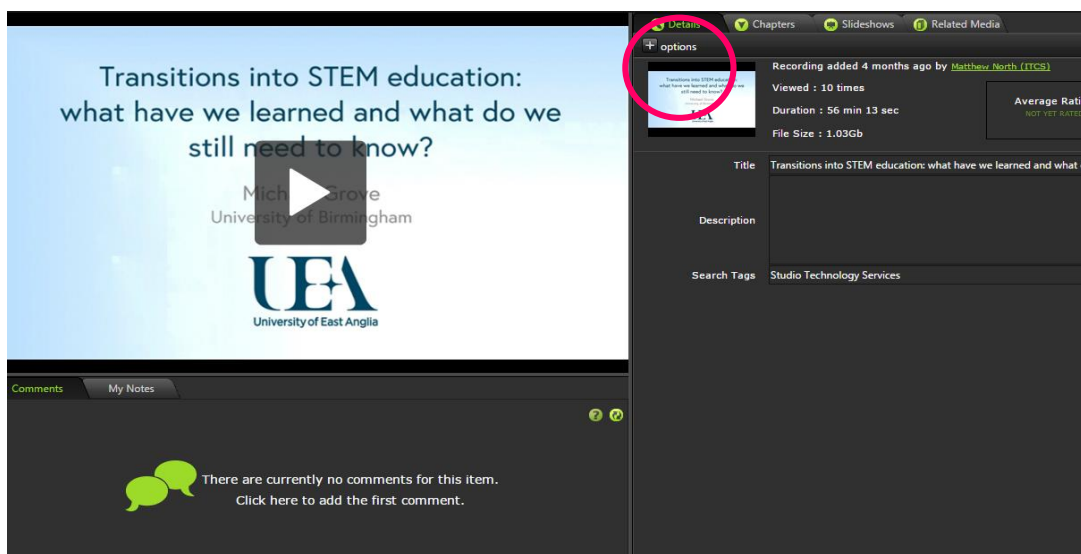

Youtube

- Find your video on Youtube
- Click on 'share' (found under the video)
- Click on the tab which says 'embed'
- Copy the embed code

eStream

- Log-in to eStream
- Find your video
- Click on the '+ options' button (found near top right of the page)
- Click on 'share'
- Copy the embed code

Adding the video onto your Liferay page

- Go to the edit screen of the web content display portlet you are inserting your video in
- Click on the 'source' button
- Paste in the embed code into the place you wish it to appear on the page
- Click on the 'source' button again
- You will see an outline of the video appear
- Click publish
- Your video should now appear
- Test the video works
